EDUCATION

Northeastern University, Boston, MA

May 2026

Master of Science in Experience Design / GPA: 3.9/4.0

Relevant Coursework: Experience Design Studio, Design Systems, Notational Systems, Disability Design, Prototyping for Experience Design, Research Methods for Design, Designing AI for Education

Bachelor of Science in Computer Science and Design / GPA: 3.8/4.0

May 2025

Honors: Magna Cum Laude

Relevant Coursework: Interaction Design Principles, User Experience Design, Brand and Identity Design, Fundamentals of Software Engineering, Human-Computer Interaction, Information Design, Database Design

EXPERIENCE

No Pool Productions, New York, NY

July 2025 – Present

Freelance Design Consultant

- Developed brand system and identity using Adobe Suite for Broadway-focused production company startup
- Designed website in Figma, conducted competitive analyses, and coded website using Typescript and Next.js

Dow Jones, New York, NY

June 2025 – August 2025

Product Design Intern

- Designed and expedited a major feature to production for the B2B product suite by gathering product requirements, prototyping in Figma, and communicating functionality with development team over Jira
- Led a group of six interns to propose a new AI-powered product to encourage Gen Z to invest by iterating upon current offerings, conducting user research, creating quality mockups, and presenting to the senior team
- Coordinated three projects on the 2025 roadmap with external user feedback and cross-functional internal teams

Boston Globe Media Partners, Boston, MA

January 2024 – August 2024

Product Management Co-op

- Coordinated five major projects to completion using Jira and Agile methodology with stakeholder feedback and engineering/design team support, including priority projects on the 2024 roadmap
 - Styled several implementations aligned with design system using WordPress CMS, HTML/CSS, and JSON
 - Proposed a major redesign of how sports content is displayed on the front page of Boston.com and the Globe
 - Queried monthly KPI data from WordPress, MailChimp, and Pagespeed Insights to strategize future product decisions
-

PROJECTS

AI Whiteboard, Boston, MA

March 2026 – April 2026

AI-Assisted Educational Design Project

- Created a digital AI whiteboard tool for students with a constructivist AI (Claude API) that can directly manipulate the whiteboard based on the user's work via prompt engineering and a JSON-based token system
- Based on insight from two group validation tests, created Figma prototype and product requirements; fed both to Claude Code and used Vite and tldraw to facilitate the creation of a single-page application whiteboard tool

Fantasy Sportsball, Boston, MA

November 2025 – December 2025

Experience Design Project

- Created a card game to redefine the sports-watching experience for non-enthusiasts that combines bingo and fantasy football to foster a greater sense of community through engagement with sports
- Based on insight from five user interviews, created experience map and card content; tested enjoyment and game flow through two user testing sessions; and designed four card iterations using the Adobe Suite

Around Town, Boston, MA

September 2025 – December 2025

Interaction Design Project

- Created branding, component library, and interactive prototype for a mobile app promoting arts accessibility in Boston
 - Conducted eight user interviews, two ethnographic observations, secondary research, and seven user tests
 - Championed accessibility-by-design, adding content accessibility tagging and color system meeting WCAG standards
-
